1,100 Tonnes

Caunton Engineering are supplying the structural steelwork for the latest new data centre building for American major company Equinix. Equinix facilitates London's most extensive financial services ecosystem from their London Slough Campus. Caunton are very pleased to report that this is the second data centre on this particular Campus with steelwork by Caunton.

Caunton is supplying and erecting over 1100te of mainly beam and column steelwork to main contractor Laing O'Rourke. Steelwork connections are designed by Bryden Wood.
