

Museum of Liverpool

.....
Client

New Museums of Liverpool

Caunton were most proud to supply the structural steelwork for The Museum of Liverpool. The museum is located at Pierhead, right on the Mersey waterfront and next door to the Liver Building.

.....
Contractor

Pihl – Galliford Try V

Caunton erected 2,000 tonnes of structural steelwork, working first off and away from the massive concrete cores.

.....
Architect

3XN and AEW Architects
and Designers

The museum took over the existing Museum of Liverpool Life, which attracted an increasing number of visitors for ten years.

.....
Engineer

Buro Happold

Client, New Museums of Liverpool, believed that this popular museum was too small to house and display its huge urban history collections satisfactorily. By building the new landmark museum, Liverpool flowed in the footsteps of previous European Capitals of Culture, Graz and Cork, which both had iconic buildings built to coincide with the title.
